Sample Work:

- <http://www.shawnsteward.com>
Designed and developed entire site, starting with Photoshop then built in XHTML using CSS and JavaScript.
- <http://www.unclebrewski.com>
Designed and developed entire site. Site is dynamic and built with PHP and MySQL. Contains security and CMS/administration modules.
- <http://www.janskidesigns.com>
Designed and developed entire site. Uses PHP, MySQL and ZenCart for the shopping cart solution. Site uses ZenCart for content management.
- <http://www.appliedsystems.com>
The design for this site was done by a 3rd party marketing agency. I developed the entire site myself from the supplied Photoshop PSD files. The site uses ASP.net, XHTML, CSS, JavaScript and Flash.
